1. System Architecture

1.1 Introduction

21 世紀網路蓬勃發展，人們遠距離溝通的方式不斷的改變：從紙筆書信轉移到 e-mail，大幅減少了送信的時間；從電話簡訊轉移到網路即時通訊軟體，降低了傳輸資料的花費。在講求效率的現代化社會中，除了要更快速傳遞訊息，也期待能用簡短的內容表達想告訴對方的事。在即時通訊軟體發展初期，人們只能透過各種符號組成簡易的表情來展現自己的情緒狀態，隨著軟體進步，逐漸發展成表情符號圖示、小貼圖，甚至動態語音圖片等，讓使用者能更快速的傳情說話。

對撰寫程式的工程師而言，給同事的訊息可能是簡短的程式碼片段，然而，現有的即時通訊軟體均以提供生動活潑的訊息內容為主要訴求，並無針對程式碼片段進行排版，部分自動轉換表情符號或貼圖的功能甚至會自動將將其為圖片或其他符號，自動調整的縮排與空白字元間距也影響到程式碼片段原有的排版方式，造成工程師溝通的困擾。因此，本團隊希望藉由修改現有的開源即時通訊軟體，調整輸入訊息與呈現內容的方式，使工程師也能利用即時通訊軟體清楚的傳送程式碼片段，增加工作效率。

本團隊開發之即時通訊軟體修改自 Converse.js，透過增加 Markdown、圖片上傳、Youtube 影片分享及檔案上傳等功能，使其達到方便工程師使用的需求。系統架構如下圖所示，包含使用者介面、Converse.js 模組及本團隊開發之 Markdown 模組、Image 模組、Youtube Plugin 模組及 File 模組，各模組均從 Converse.js 中的 chatview 延伸出去，再與現有的 API 或功能套件進行溝通與資訊交換。使用者將透過 UI 介面控制 Converse.js 中的 chatview，由 Markdown 模組處理及轉換帶有 markdown 標記的訊息；由 Image 模組上傳圖片至 Imgur 取得下載連結，顯示訊息中連結的圖片；由 Youtube Plugin 模組顯示訊息中的 Youtube 影片並以網頁撥放器開啟；由 File 模組上傳檔案至 File.io 並取得下載連結。其餘基本聊天室功能包含暱稱設定，建立聊天室及選

擇好友等功能則沿用 Converse.js 原有之內容，其與一般通訊軟體常見之功能無異。

本文件敘述 Converse.js 功能擴充需求之詳細內容與其系統架構。需求部分可分為 Functional 需求與 interface 需求兩部分，前者包含 Markdown、Image Upload、Youtube Plugin 及 File Upload 等四項，並建立數個處理該需求的 Module 及修改 Converse.js 原有的 Module；後者為因應 Functional 需求而增加或修改的 Module 間所需要的溝通及使用者操作 interface 需求。根據上述需求建立系統架構圖，並以 Goal-driven Use Case 的精神，設計 13 個 Use Case，做為確認無需求被遺漏與未來測試資料撰寫之參考。

1.2 Architecture Expression

Following are the new functionalities of the system:

Module	Descriptions
Markdown module	This module provides 7 markdown functionalities, including code block, heading, URL, table, number/bulleted list, emphasize, and function toggle.
Image module	This module provides image-upload-related functionalities.
Youtube plugin module	This module provides Youtube-plugin-related functionalities.
File Module	This module provides file-upload-related functionalities.

Following are the system components that already exist, but would be going to interact with our new functions:

Module	Descriptions
UI module	Composed of HTML templates and SASS stylesheets. This module provides interfaces of IM to users.
Chatbox module	This module handles everything about sending and receiving messages on the client side.
Server	This is the XMPP server.
Third party module	This module includes 3 websites: Imgur, Youtube and File.io .

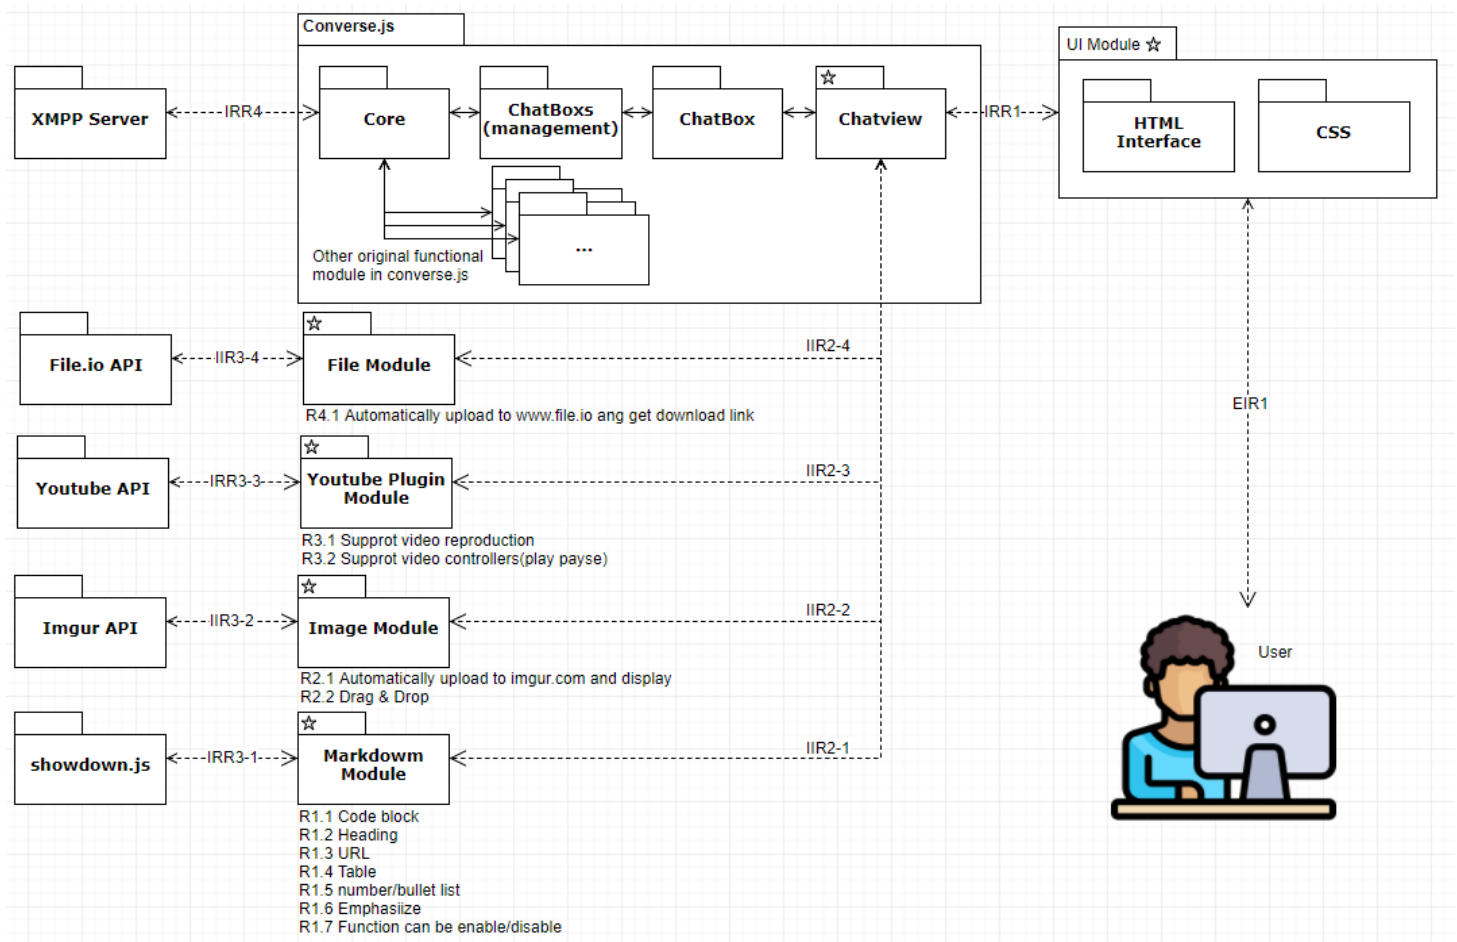

Figure 1: System Architecture

2. Functional Requirement

Markdown Module	
R1.1	Code block
	Code block is a block using monospaced font . User can input source code Inline or blocks:
R1.1.1	<u>Inline</u> Inline code has back-ticks (` `) around it. Such like: It is <code>`source code`</code> .
R1.1.2	<u>In a block</u> keying in 4 blank character or a tabular character (tab) in the head. Such like: <pre>function y = (int x){ y = x ^ 2; }</pre>
R1.2	Heading
	keying 1 to 6 hashtag character (#) can change the line style to heading H1 to H6. Such like: <pre># this is heading H1. ## this is heading H2. ### this is heading H3. #### this is heading H4. ##### this is heading H5. ##### this is heading H6.</pre>
R1.3	URL
	If there are some Hyperlinks string in text. Such like <pre>http://www.google.com.tw/ https://tw.yahoo.com/ ftp://myftp.hinet.com.tw/</pre> The Hyperlinks string will change to a HTML Hyperlinks. User

	can click it to open a website.
R1.4	Table
	<p>Keying some vertical line character () to separate data can make a HTML table. Such like:</p> <pre> A B C 1 2 3 </pre>
R1.5	Numbered list and Bulleted list
R1.5.1	<p>If the first character is a number and a dot (.) behind it and space () between the item. The line will change to Numbered list. Such like:</p> <pre>1. train 2. car</pre>
R1.5.2	<p>If the first character is a plus (+), a dash (-) or an asterisk (*) behind it and space () between the item. The line will change to Bulleted list. Such like:</p> <pre>. apple . orange . mango or + apple + orange + mango or * apple * orange * mango</pre>
R1.6	Emphasize
R1.6.1	<p>A emphasize text has asterisk character (*) or underline character (_) around it.</p> <p>Using single asterisk (*) or underline (_) will change to HTML tag . Such like:</p> <pre>this is *very* important. this is _very_ important.</pre>

R1.6.2	Using double asterisk (**) or underline (__) will change to HTML tag . Such like: this is really important. this is <u>really</u> important.
R1.7	Function can be enabled or disabled
	The function in R1.1 to R1.6 can be enable or disable in control panel.
R1.7.1	For R1.1
R1.7.2	For R1.2
R1.7.3	For R1.3
R1.7.4	For R1.4
R1.7.5	For R1.5
R1.7.6	For R1.6
Image Upload Module	
R2.1	Automatically upload to Imgur.com and display
	The function allows users to view images in the chat by embedding its URL, these images are upload to Imgur.com.
R2.2	Drag & Drop
	The function allows users to upload images into the chat via drag & drop and being able to send them.
Youtube Plugin Module	
R3.1	Support video reproduction
R3.1.1	Be able to watch the Youtube video in IM after paste Youtube URL
R3.1.2	The video won' t be played unless you press the 'playing button'
R3.1.3	When video is playing, the title and Youtube logo will be hided.
R3.2	Support video controllers (play,pause)
R3.2.1	Button for playing and pausing Youtube video.
R3.2.2	Website link button: user can go to the Youtube website of this

	video by this button.
R3.2.3	Fullscreen button: user can watch the video with full screen or with normal size.
R3.2.4	Volume button: User can change the volume and mute the video.
R3.2.5	User can see the timeline and change the time of the video.
File Upload Module	
R4.1	Automatically upload to File.io and display
	The function allows users to send files in the chat by embedding its URL, these files are upload to File.io
R4.2	Drag & Drop
	The function allows users to upload files into the chat via drag & drop and being able to send them.

3. Interface Requirement

3.1 External Interface Requirements

EIR1	UI module and user
	UI module display correct interfaces to user.

3.2 Internal Interface Requirements

IIR1	UI module and chatview module
	Chatview determines how messages should display on the user interface. That is, chatview calls the correct template and stylesheet for a message.
IIR2-1	Chatview module and markdown module
	The Markdown module turn messages into the right formats and let chatview handle the rest parts (sending and receiving).
IIR2-2	Chatview module and Image module
	The Image module turn messages into the right formats and let chatview handle the rest parts (sending and receiving).
IIR2-3	Chatview module and Youtube plugin modules
	The Youtube plugin module turn messages into the right formats and let chatview handle the rest parts (sending and receiving).
IIR2-4	Chatview module and File module modules
	The File module turn messages into the right formats and let chatview handle the rest parts (sending and receiving).
IIR3-1	Markdown Module and showdown.js
	The user enters a message with markdown label or code, and the showdown.js will convert message text to HTML DOM object with markdown style.
IIR3-2	Image module and Imgur API
	After a user has chosen an image, the image module

	automatically upload it to Imgur.com, and get the URL.
IIR3-3	Youtube plugin module and Youtube API
	Youtube plugin module captures videos from Youtube.com according to the URL that user provided.
IIR3-4	File module and File.io API
	After a user has chosen a file, the file module automatically upload it to www.file.io, and get the URL.
IIR4	Chatbox module and server
	This interface connects client and server via XMPP protocol.

4. Goal-driven Use Case Diagram

4.1 Introduction to Goal-driven Approach

本專案採用 Goal Driven(目標導向)Use Case 表示，強化表現出本系統所想達到的目標，以及此系統的非功能性需求的描述，以及和使用案例的相依關係，此系統分為三個層面去做分析：能力面、觀點面、內容面。根據能力面，判斷此目標是否該被完全滿足，分出強制性的目標和非強制性的目標。根據觀點面，判斷目標若是以角色觀點來描述，將之稱為角色相關；若與系統相關，稱作系統相關。在從內容面判斷，若此目標為系統上定義的功能，稱作功能性目標；相反的將之稱為非功能性目標。

4.2 Objective Statement

目標名稱	目標屬性	目標描述
support markdown fuctions	(R,A,F)	User can take advantage of variety of markdown functions.
Markdown function control	(R,A,F)	User can decide whether to turn on or turn off markdown triggers.
support image uploading	(R,A,F)	User can upload images and send it to others.
watch video	(R,A,F)	When user sends or receives a youtube link the chat box will show a player framework for user to play.
support file uploading	(R,A,F)	User can upload files and send it to others.

屬性	說明	屬性	說明
R	Rigid	S	Soft
A	Actor-Specific	Y	System-Specific
F	Functional	N	Nonfunctional

Use Case ID	UC-R1.5
Use Case Name	使用 Markdown 中的 list with number or bullets 功能
Goal	包含特定格式的輸入內容成功轉換為 list
Requirement	R1.5
Description	<p>使用者輸入</p> <pre>1. apple 2. banana 3. cat + apple + orange + mango</pre> <p>並送出訊息，視窗自動將內容轉為編號清單與項目清單</p>
Actor	user
Assumptions	
Constraints	
Priority	
Pre-Conditions	list 功能為 enable 狀態
Post-Conditions	
Basic Flow	同 Description
Alternative Flows	輸出使用者輸入的內容，不做任何修改
Exceptional Flows	輸出使用者輸入的內容，不做任何修改
Use Use Case	
Extends Use Case	
Business Rules	
Special Requirements	
Artifacts	
Use Case Glossary	

Use Case ID	UC-R1.6
Use Case Name	使用 Markdown 中的 emphasize 功能
Goal	包含特定格式的輸入內容成功加上的 emphasize 標籤
Requirement	R1.6
Description	
Actor	user
Assumptions	使用者輸入 this is <i>very</i> important. you should pay attention . 並送出訊息，視窗自動將 very 加上 標籤， pay attention 加上 標籤
Constraints	若已進行 R1.1，R1.2，R1.4 之轉換，則不進行此轉換
Priority	第二順位，即在 R1.3，R1.4 後轉換
Pre-Conditions	emphasize 功能為 enable 狀態
Post-Conditions	
Basic Flow	同 Description
Alternative Flows	輸出使用者輸入的內容，不做任何修改
Exceptional Flows	輸出使用者輸入的內容，不做任何修改
Use Use Case	
Extends Use Case	
Business Rules	
Special Requirements	
Artifacts
